## Food manufacturer replaces 110 valves along with order for new Thinktop units.

A Scottish based customer has recently placed an order for 110 Alfa Laval valves with an aim of replacing all existing valves over the next 3-4 years.

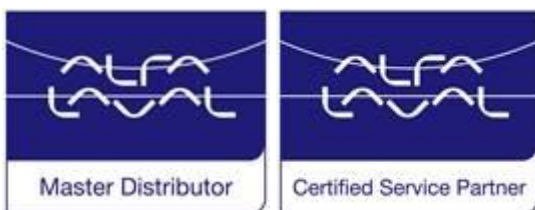

The Alfa Laval ThinkTop has also been ordered by the customer. The second generation of Alfa Laval ThinkTop, only released this month has generated significant interest in the market with customer eager to benefit from the new diagnostic and interactive features that have been incorporated into the technology.

The new ThinkTop offers ease of maintenance and up to 90% CIP liquid savings from the reconfigured burst seat clean system. It also received the IP69K rating, making it a clear choice for the customer.

With the purchase of 30 Alfa Laval TJ20G Rotary Jet Head supplied over the last 3 – 4 year to the customer, Alfa Laval products continue to offer customers the complete equipment process package.
